

**Date and time:**

Friday Oct 16, 2020 at 10:00 am

**Location:**

Online – Discord

**List of attendees:**

Mason Brouwer - Project Manager, Sai Chava - Client liaison, Zach Skrobot - Security, Fu Junnan - Meeting coordinator, Avni Avdulla - Web Master

**Project background:** Automotive manufacturers are rolling out semi-autonomous features to deliver convenience, efficiency, and enhanced safety features for vehicles.

**Meeting Purpose and Topic:**

- The background of the project website suggests adding pictures to decorate.
- To discuss how to deal with the accidental collision system when the vehicle is running automatically.
- The driver always has the highest driving control: During automatic driving, control of the vehicle shall be immediately returned to the driver when there is any operation of the steering wheel, accelerator and brake pedal.
- Prepare and summarize the best requirement questions as appropriate.
